

ARKADOS TO SHOWCASE SYSTEM-ON-CHIP (SoC) SOLUTIONS AT HOMEPLUG POWERLINE TECHNOLOGY CONFERENCE

NORTH PLAINFIELD, NJ, September 26, 2005 – Arkados, Inc. (OTCBB: CDKN), a wholly owned subsidiary of CDKNnet.com and a provider of technology solutions that enable broadband transmission and entertainment networking over standard electricity lines (“the powerline network”), is scheduled to speak and exhibit at The HomePlug Powerline Technology Conference in San Francisco September 27- 28 at The Embassy Suites Hotel in Burlingame, California.

“Powerline communication has often been cited as a key ingredient to the connected home,” said Oleg Logvinov, Arkados CEO. “The Arkados solutions are designed to enable multimedia applications in the connected home.”

The demonstration by Arkados will showcase a first-in-the-industry device that integrates the HomePlug PHY/MAC technology with multimedia interfaces and application firmware in a single chip solution.

The HomePlug Alliance's two-day conference features keynote addresses by executives from Intel, Cisco-Linksys, Motorola, and Bell Canada. They are joined by over fifty expert speakers and panelists from a cross-section of industries, including the Consumer Electronics Association (CEA), Comcast, Conexant, Current Technologies, Duke Power, Earthlink, Intellon, Leviton, NETGEAR, Parks Associates, Philips, RadioShack Corporation, Sharp and Sony, among others. Arkados is a Gold Sponsor of the conference together with EarthLink, Intel, Intellon, and Motorola.

About Arkados

Arkados Inc. has developed, and plans to manufacture and supply system-on-chip semiconductors to enable easy-to-use digital connectivity between many consumer entertainment and computing devices. Redefining “plug and play,” Arkados solutions are designed to create a virtual, home-wide entertainment and information network enabling digital data to be shared between stereos, radios, computers, speakers, mp3 players, televisions, cable and DSL modems, and a host of other devices. The Company’s semiconductors are designed to facilitate the production of sophisticated, full-featured products at a lower production cost, faster time-to-market, and a high degree of programmability. Arkados chips are designed to conform to HomePlug Powerline Alliance standards and can also be used for in-building and to-the-home applications. The Company has strategic partnerships with Leviton Inc, and GDA Technologies.

Arkados Inc. (OCTBB: CDKN) is based in North Plainfield, N.J., is a wholly owned subsidiary of CDKNet.com Inc.

This report includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934. The information in this news release includes certain forward-looking statements that are based upon assumptions that in the future may prove not to have been accurate and are subject to significant risks and uncertainties, including statements as to the future performance of the company and the risks and uncertainties detailed from time to time in reports filed by the company with the Securities and Exchange Commission. Although the company believes that the expectations reflected in its forward-looking statements are reasonable, it can give no assurance that such expectations or any of its forward-looking statements will prove to be correct. Factors that could cause results to differ include, but are not limited to, successful performance of internal plans, product development acceptance, and the impact of competitive services and pricing and general economic risks and uncertainties.
