ARKADOS TO SPEAK AT DIGITAL HOLLYWOOD CONFERENCE ON WEDNESDAY, JUNE 13, 2007

**The NexGen Entertainment Home Experience:
From the Smart & Connected TV to the PVR, Set-Top & PC Experience**

SANTA MONICA, CA, June 13, 2007 -- Arkados (OTC BB: AKDS), known as “the HomePlug® Applications Company,” announced today that its Director of Marketing, Jim Reeber, will participate in a discussion of “The NexGen Entertainment Home Experience: From the Smart & Connected TV to the PVR, Set-Top & PC Experience” at the Digital Hollywood Conference, on Wednesday, June 13, 2007.

Reeber said, “The introduction of digital video and audio has changed the relationship that consumers have with their entertainment content. They now expect a great variety of entertainment options at their fingertips. The movement in consumer electronics promises to preserve the experiences we’ve had with television, movies, video games, the internet, and digital audio, but combine them into a new experience. Coupled with easy-to-use home networks -- like HomePlug technologies provide -- the new wave of digital entertainment combines with the wealth and immediacy of internet content – creating an ecosystem of connected devices that can enrich and personalize a consumer’s entertainment experience.”

“The Digital Hollywood event brings together content producers and technology providers. The event itself is indicative of the direction the industry has taken in digital content delivery. Arkados engineers anticipated this direction quite some time ago, and we have been focused on developing the silicon and application platforms for delivering digital content in the home. Our commitment to this concept is underscored by our turnkey solutions and reference designs for digital home audio & video components.”

He concluded, “Arkados is well-positioned in this market, because our system-on-a-chip technology uses HomePlug technology to allow devices to be connected easily and quickly, so that the consumer gets the content he or she wants when they want it, and where they want it in the home.”

About Arkados, Inc.

Arkados, “the HomePlug Applications Company,” delivers a universal platform that enables networking of home entertainment and computer devices using standard electricity lines. The company’s system-on-chip solutions are uniquely designed to drive a wide variety of powerline-enabled consumer electronics and home computing products, such as stereos, radios, speakers, MP3 players, computers, televisions, gaming consoles, security cameras and cable and DSL modems. Arkados customers can bring numerous sophisticated, full-featured products to market faster at a lower overall development cost using a single platform: the company’s versatile and programmable ArkTIC™ platform. Arkados solutions leverage the benefits of HomePlug Powerline Alliance specifications and can also be used for in-building and to-the-home (BPL) applications. Arkados™, ArkTIC™ and Direct to Speaker™ are trademarks of Arkados Inc., a wholly owned subsidiary of the Arkados Group, Inc. HomePlug® is a registered trademark of the HomePlug Powerline Alliance, of which Arkados is a member. Other names and brands may be claimed as the property of others.
